

VGR Topchanger

The VGR Top Changer combines the actions of aeration and sand filling in one efficient action. It weighs only 410kgs, has a working width of 1.60m and produces a closely spaced row of holes which are immediately filled with sand and, or both liquid and solid amendments. This allows a path for air and water to penetrate the top layer of soil and be absorbed directly into the rootzone to encourage rapid growth and healthy development of the grass, and over a period of time completely change the top surface without any interference in play.

SPECIFICATIONS

Working width	1.60m
Transport width	1.81m
Weight (approx)	410kgs
Volume filler	66 gallons
Injection pressure (up to)	4,061 psi
Fill pressure	29 - 166 psi
Water usage	951 gallons/hour
Power requirement	45 – 50HP
