

Vredo Compact Series

Due to the unique action of the Vredo seed application, the grass seed is placed in direct contact with the soil, giving almost total seed germination. A double row of discs give 35mm seed spacing, meaning that one-pass operation will generally suffice with no disruption to play even on fine turf. 4 models of the Super Compact Series are available, each as a 3-point linkage mounted option or towed with it's own hydraulic lift frame.
