

IMANTS® SHOCKWAVE HEAVY DUTY SERIES 220 / 275

The Imants ShockWave is a heavy duty linear decompactor, designed to revitalise heavy wear areas by relieving soil compaction, improving aeration and removing surface water. The 2.20 / 2.75 models are a heavy-duty design suitable for local government and contractors, utilising the thicker 15mm blade. It also features hydraulic depth adjustment from tractor. As with all ShockWave models, it features a nochains direct drive, 'sealed for life' bearings & the mechanical drive overload protection.
