

QUIET, EFFICIENT & ECO-FRIENDLY PERFORMANCE

Roll Greens Effortlessly With The HP2E Electric Roller

The Salsco HP2E Electric Roller is a cutting-edge, Eco-friendly turf roller engineered for superior performance without the drawbacks of noise, heat, or oil emissions.

Boasting 8 MPH and a 36-inch rolling swath, it ensures optimal traction and a smooth, slip-free rolling experience making it an ideal choice for professional turf maintenance.

HP2E sets the standard for electric-powered turf rollers, providing efficiency, reliability, and an exceptional rolling experience.

Optional Attachments To Elevate Turf Care:

Top Dressing Brush Kit – Ensures even distribution and better integration of topdressing materials. Available in 2 options: soft or hard brushes.

Aeration Spiker Kit – Promotes improved air and water penetration, fostering healthier turf growth.

Tournament Roll Kit – Delivers an ultra-smooth, tournament-ready finish for championship-level greens.

Smart Screen Display

LCD Smart Screen display. Bright digital monitor shows speed, battery charge level, alerts and faults. Allows access to switch between Training and Pro mode.

Steering Wheel

14" diameter- automotive type. One chain steering unit delivers smooth, consistent maneuverability, ensuring effortless steering and control during operation.

Adjustable Foot Pedals

Foot pedal height is adjustable manually by setting retractable spring pin. Allowing operators of all sizes to easily achieve an appropriate fit.

Tilt Trailer

Features an adjustable cushion cylinder, magnetic locking system with safety latch, deflector guards and a rubber trailer mat for added traction.
